 - Integrated latch and lift handle for easy dumping
 - Accepts optional Flatbed Kit
-
- Machine: 2 years residential, 90 days commercial
 - Engine: 2 years residential, 90 days commercial

Features

Gear-Driven Transmission 3 forward speeds and powered reverse let you match your travel speed to your walking pace and maneuver in tight spaces.

MUCH More Maneuverable than ANY Trailer! The two rear wheels rotate 360° giving the Powerwagon a very tight turning radius. This means you can go into all kinds of spaces you could never take a trailer...through gateways and barn doors, into wooded areas, on narrow trails, etc.

Integrated Latch and Lift Handle The locking cargo bed handle is designed so that you can twist, to unlock the bed, and lift, to tilt the cargo bed into dumping position, with one just one hand (depending on the weight of the load). The steep 60° dump angle empties the bed thoroughly, minimizing the need for raking out materials.

Disc Brake A powerful hand-actuated disc brake lets you check the speed of a fully loaded cargo bed when operating on slopes. The brake lever is also lockable to keep the machine in place when not in use, and to add stability during loading or unloading.

Flatbed Option Our Flatbed Kit lets you convert to a flatbed configuration in less than ten minutes. The flatbed is ideal for carrying long or stackable loads like lumber, feed bags, cinderblocks, furniture...you name it! (Included with the PRO XL model, available option for the PRO model.)
