

ALL STEEL IMPELLER is so durable it comes with a LIFETIME WARRANTY. Serrated fins aggressively mulch and reduce collected material 10:1!

Dr Power Leaf and Lawn Vacuum

POWERFUL DR ENGINE High-quality 9.2 HP DR OHV engine (301cc) produces 15.3 ft-lbs gross torque (at 2500 rpm per SAE J1940). Available with your choice of manual- or electric-starting.

EXTRA LARGE COLLECTION BAG Handles up to 8 cubic feet of debris, allowing for less frequent dumping than competitive models. Uses easily accessible side zipper bags for fast and effortless emptying. Bag is quickly detachable (without use of tools or hook and loop fasteners) for discharging contents away from the machine. Where you can't take a larger machine, it has the best combination of power and collection capacity available. And the onboard chipper lets you dispose of 2" branches on the go.

POWER ASSISTED DISCHARGE By opening one or both of the side flaps, then starting up the engine, the impeller will provide a blast of air that will blow contents out of the bag quickly and efficiently.

ADJUSTABLE INTAKE HEIGHT From the operator's position the collection snout can easily be adjusted from 1" off the ground (for maximum vacuum power) to a maximum of 5" (for less suction, or to create clearance for uneven terrain).

SKU: WL35208DEN

Price: \$2699.99

FLEXIBLE INTAKE SKIRT Flexible rubber border on the intake rides close to the ground to maximize suction but rides easily over roots, rocks, and uneven terrain.

Categories: [DR Power Equipment](#)

PNEUMATIC TIRES For easy rolling, even on challenging terrain. Front wheels are 14" x 4", rear wheels are 8" x 3". Rear wheels swivel for responsive steering.

Product Description

OPTIONAL VACUUM HOSE For hard to reach areas. The optional vac hose gives you seven feet of extra reach so you can clean out areas you can't get to with the front collector snout—garden beds, along foundations, window wells, etc.

Our PRO SP model steps up from our entry model by adding 1) Self-Propulsion (with three forward speeds and one reverse), 2) 33% more collection capacity (8 cubic feet), and 3) an onboard chipper that lets you dispose of branches up to two inches in diameter as you work your way around the yard.

We also include bigger front tires (14") and a flexible skirt on the intake snout that will ride over roots, rocks and other irregularities on your yard without jolting the machine to a stop—so you can keep the intake close to the ground (maximizing suction power) and work with fewer interruptions.

The transmission uses our EZ-Turn™ steering technology so you don't ever have to wrestle with the machine. The PRO SP is powerful, easy to use, and has the highest collection capacity of any walk-behind vacuum available!

Optional Vacuum Hose for Hard to Reach Areas

The transmission uses our EZ-Turn™ steering technology so you don't ever have to wrestle with the machine. The PRO SP is powerful, easy to use, and has the highest collection capacity of any walk-behind vacuum available!

Product Summary

- 9.2 HP (301cc) DR OHV Engine available with manual- or electric start
- Self-Propelled: 3 forward speeds, 1 reverse
- EZ-Turn™ Steering for nimble maneuvering
- Onboard Chipper for branches up to 2" in diameter
- Capacity: 8 cu. ft. (80 lbs)
- Reduces collected materials 10:1 (rear)
- Intake height: 1" to 5"
- Side zipper openings for easy emptying
- Tires: Turf Tread, 14" x 4.5" (front), 8" x 3" (rear)

Warranty Coverage

- Machine: 2 years residential, 90 days commercial
- Engine: 2 years residential, 1 year commercial

Features

SELF-PROPELLED EASE! With three forward speeds and one reverse—all easily accessible from the operating position—the PRO SP is designed with your comfort and ease of use in mind.

EZ-TURN™ Steering Makes for effortless cornering and 180° turns. When you initiate a turn, the two axle shafts are free to drive independently and go wherever you guide the machine.
